Aquatic Therapy is a unique therapy which Julie has brought home.

It has been proven to accelerate recovery time from injuries, increase circulation, improve mobility, and decrease pain. It can help treat a wide variety of symptoms and conditions .

About the Webinar

This webinar will help you learn more about aquatic therapy and find out how this may be right for you.

Other seniors have found immediate relief for rotator cuff pain, back aches, hip discomfort and debilitating leg/ankle pain.

Aquatic Therapy and Julie Moon has given much relief to a 73 year old woman who suffered from rheumatoid arthritis for over 10 years. Normally using a scooter or crutch to get around, Julie was able to provide much needed relief for the woman through aquatic therapy in the endless pool.

Julie Moon has been in the business of Physical Therapy for over 15 years. After graduate school in the mainland, she returned to Hawaii. Aquatic Therapy is a unique therapy she has brought home.
